## Sludge Free Water Feed

## Ref: RED-OXY LAB Instruction

KL

After RED-OXY-ADSORB chemical treatment the formed sludge **should be separated** and **must not be fed** in the filter media columns.

**DO NOT** feed the precipitated **Sludge** in the filter columns!

Sludge Removal Filter
Put a Sludge-Removal Filter
Pad on the top of the KL Filter
Column to protect the filter
bed from being loaded with
Sludge.

This is a precautionary stage to protect to keep the filter columns free of any sludge.
